

HUMA ASHRAF

AI/ML Engineer | Data Science | Python

✉ humaashrafccch@gmail.com ☎ +92 3062444990 📍 Islamabad 🔗 [humaashraf](#) 🌐 huma

Personal Statement

AI/ML-focused graduate with hands-on experience developing machine learning and GenAI applications using Python, SQL, scikit-learn, LangGraph, RAG, FastAPI, and vector databases. Experienced in AI development, predictive modeling, data preprocessing, and building application-focused ML solutions

SKILLS & INTERESTS

- **Programming:** Python, SQL, R, C/C++, Java
- **AI/ML:** Machine Learning, Predictive Modeling, NLP, Statistical Analysis, Scikit-learn, TensorFlow
- **Tools:** Git/GitHub, Jupyter, Tableau, Matplotlib, Seaborn
- **GenAI:** LLMs, RAG, LangGraph, LangChain, Vector Databases
- **Backend & Data:** FastAPI, Flask, MySQL, Pandas, NumPy

Work Experience

- AI Engineer, Freelance (Auto Excel)**

06/2026 – 07/2026
Islamabad, Pakistan

 - Built AI agents for image extraction, vehicle data processing, and automated content generation.
 - Developed LLM-based automation workflows using **Claude Code, Hermes, and AI agents**.
 - Integrated external APIs and backend services into end-to-end AI processing pipelines.
 - Collaborated through GitHub workflows and deployed AI applications on cloud platforms.
- Data Science Intern, Medical Imaging and Diagnostic Lab, NCAI**

11/2025 – 01/2026
Islamabad, Pakistan

 - Automated medical imaging data preprocessing workflows, improving data quality by **25%**.
 - Applied machine learning and statistical methods to healthcare data processing.
 - Optimized data workflows to improve processing efficiency and model readiness.
- AI Intern, Software Productivity Strategists (SPS)**

07/2025 – 09/2025
Islamabad, Pakistan

 - Contributed to an AI-powered HR Assistant using **IBM Watsonx**.
 - Supported full-stack development of a BMS platform using **PHP/MySQL**.
 - Developed Flutter features in an **Agile/Scrum** environment and performed automated testing.

Projects

- DastoorDesk, Agentic RAG Legal AI**

02/2026 – 04/2026

 - Built an Agentic RAG system using **LangGraph** for automated legal query processing.
 - Implemented ChromaDB-based retrieval, improving reported AI accuracy by **30%**.
 - Developed a FastAPI + Ollama backend with **<60s** response time.
 - Integrated real-time speech-to-text using the Web Speech API.

Breast Cancer Diagnostic System, Thesis	10/2025 – 12/2025
• Developed an ML diagnostic model using genomic biomarkers with 94% classification accuracy. • Applied PCA for feature reduction and improved model efficiency. • Built a full-stack genomic analysis platform with <3s response time.	

Education

MS Software Engineering, National University of Sciences and Technology (NUST)	09/2026 – Present Islamabad, Pakistan
Bachelor of Science (Honours) in Bioinformatics, COMSATS ISLAMABAD	02/2022 – 03/2026 Islamabad

Leadership & Achivements

- Captain, Women's Basketball Team — COMSATS Islamabad
- Team Lead, Robian 2024
- Speed Programmer, Devsinc National Hackathon 2024
